**Application for Congenital Cardiac Database**

\* Please type or print legibly. To ensure accuracy please enclose copy of the dog's registration papers :

previous application number (if any) \_\_\_\_\_

registered name Ch. Aspenglo Catch me if you can

breed Golden Retriever

ID number (if any) \*  Tattoo  Microchip  AV10 082 368 604

registration number SR04426704  AKC  CKC  Other \_\_\_\_\_

sex Male color Golden

date of birth (month-day-year) 10-7-2002

registration number of sire SN79246502 registration number of dam SN39597703

The OFA has adopted a policy effective January 1, 2001, acknowledging animals that have been submitted for inclusion in our databases that have permanent identification in the form of microchip or tattoo. Animals not permanently identified will continue to be evaluated; however, they will be issued a number clearly indicating that the animal has no permanent identification.

I hereby certify that the animal examined is the animal described on this application. I understand that only normal results will be released to the public unless the initials of a registered owner appear in the authorization box below which permits the OFA to release abnormal results to the public.

Signature of owner or authorized representative \_\_\_\_\_

**Authorization to Release Abnormal Results**

I hereby authorize the OFA to release the results of its evaluation of the animal described on this application to the public if the results are abnormal \_\_\_\_\_ (initials of registered owner).

**Veterinary Instructions**

Cardiac auscultation (see accompanying procedures information for details):

- Auscultation is within normal limits. Additional diagnostic studies are not indicated.
- Auscultation reveals a soft (grade 1 or grade 2) murmur at rest.
- Auscultation reveals a moderate to loud heart murmur.
- Auscultation was performed after exercise and revealed:
  - Normal heart sounds without a cardiac murmur.
  - A soft (grade 1 or grade 2) murmur.

Describe any cardiac murmurs:

Timings:  systolic  diastolic  continuous

Point of maximal intensity:

- mitral valve area
- aortic or subaortic area
- pulmonary valve area
- tricuspid valve area
- other location: \_\_\_\_\_

Radiation or other characteristics: \_\_\_\_\_

Echocardiography if indicated (see accompanying procedures information for details):

- Echocardiography with Doppler was performed and the results were within limits of normal.
- Echocardiography with Doppler was performed and the results were equivocal: mild congenital heart disease cannot be conclusively diagnosed nor excluded based on this study.
- Echocardiography with Doppler was performed and the results were indicative of congenital heart disease.

Describe any abnormal echocardiographic or Doppler findings, including transvalvular or other pertinent velocities in m/sec.

pulse/continuous wave  left apical/subcostal

Summary evaluation and opinion of the examiner:

- Normal cardiovascular examination—congenital heart disease is not evident
- Equivocal cardiovascular examination—congenital heart disease cannot be diagnosed nor excluded; status uncertain for breeding.
- Abnormal cardiovascular examination indicative of congenital heart disease; indicate diagnosis below: \_\_\_\_\_

I certify that the standards for cardiac examination as set forth by the OFA were carefully followed in performing this examination.

Veterinarian Signature \_\_\_\_\_

Specialty:  Practitioner,  Specialist,  Cardiologist

Date 8/15/05
